

Harel Alejandro Olguín Gaytán

SOFTWARE ENGINEER

I'm a software engineer student with broad experience and knowledge in modern technologies, best practices and collaborative work for software solutions. I'm specialized in Web Applications development.

WORK EXPERIENCE

InovenTI

Software Engineer Intern

January 2024 - Currently

- Developed web solutions to various problems and requirements to a Project Management tool used widely across the state. I managed the implementation of features on both backend and frontend, as well as the database design in some cases.
- Using the MVC pattern and Git I managed to deliver the solutions in time collaborating with other people to test and deploy

PROJECTS

Dates App

School Project

2024

https://github.com/Harel-ITESO/dates_app

- Simple app made in Express JS which worked as a modern dating app, using a modern match system, real time chat with WebSockets, authentication using JWT and OAuth, and JQuery to manage the frontend. I learned a lot from this project about MVC, authentication and collaborative work.

Judge My Portfolio

Personal Project

Work In Progress

<https://github.com/harelog3/judge-my-portfolio>

- Web application made for developers to post their portfolio and receive feedback from other users, with features such as star ratings, comments and views.
- The project is currently under development, it's using React, Express, PostgreSQL and JWT for its core functionalities.
